

Manufacturing of Hydraulic Systems and Power Units

ABOUT US

fpe Hydraulik GmbH was founded as a hydraulics specialist company in 1991 with headquarters in Hohenstein-Ernstthal and a branch in Langenfeld (Rhineland) in 2012 (Germany). We have experienced and qualified employees who work with the latest technology and processes. Our services meet the highest quality standards, are certified according to DIN EN ISO 9001:2015, and we have also an ECM release.
We are your reliable partner – from the idea to the final product!

WHY?

- Cost-optimized modular system for standard power units
- Use of components optimally matching in quality and cost-effectiveness
- Documentation according to current guidelines

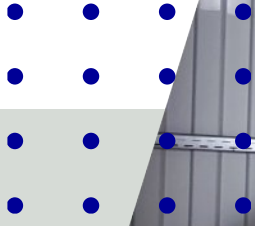

WHAT?

- Incorporation of branded components
- Construction using modern Autodesk CAD technology
- Joint development of the task specifications through technical dialogue

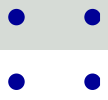

HOW?

- Custom-designed and manufactured
- Perfectly tailored to your application

Your Project. Our Passion.

Our service includes extensive, internationally recognized documentation of all system components. Furthermore, this encompasses the planning, supply, and installation of electrical controls and regulation systems.

We guarantee high availability through the use of modern automation technology and remote maintenance solutions. We reduce your energy consumption through targeted measures for energy and system optimization.

The installation is carried out by our own specialized personnel according to the latest technical standards. We handle the complete commissioning, instruction/training and regular maintenance. For piping installation, we preferably utilize the proven Parker EO2, EO2 Form, and Parkrimp Systems.

Drive Types

- Electric Drive
- Combustion engine drive
- Electric frequency-controlled drive

Pump Types

- Submersible Pumps
- Refill Pumps
- Auxiliary Tank Pumps
- Fixed Displacement Pumps
- Variable Displacement Pumps

System Types

- Open Hydraulic Circuit
- Closed Hydraulic Circuit
- Mobile applications
- Stationary applications

Tank Configurations

- Steel
- Stainless steel
- Plastic
- ATEX
